

Wear a pair of rubber gloves when handling Beryl's Friendly Bacteria otherwise it makes your hands smelly!

1. For up to 6 chickens use the 6 hen sachet and mix the contents with 40ml (2 tablespoons) of vegetable oil. Mix this into 250g of feed.
2. For up to 7 -12 chickens use the 12 hen sachet and mix the contents with 80ml (4 tablespoons) vegetable oil. Mix this into 500g feed.
3. Give the Beryl's treated feed first thing in the morning as the only source of feed until it has all been consumed.
4. Refill the feeder with plain feed.

Give beryl's Friendly Bacteria as early in life as possible and thereafter monthly
